DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to the following patentably distinct species of the claimed invention:

Species I: an oscillator having a structure shown in figure 1, i.e., claim 14.

Species II: an oscillator having a structure shown in figure 30, i.e., claim 27.

2. If species I is elected, the applicants are further required to select the following patentably distinct species:

Sub-species IA: an oscillator with a programmable memory having a structure shown in figure 24, i.e., claim 23.

Sub-species IB: an oscillator with a programmable memory is a programmable gate writer having a structure shown in figure 25, i.e., claim 24.

3. If either sub-species IA or IB is elected, the applicants are further required to select the following patentably distinct species:

Sub-species IAA or IBA: an oscillator with a digital tuning circuit having a structure shown in figure 6, i.e., claim 19.

Sub-species IAB or IBB: an oscillator with a digital tuning circuit having a structure shown in figure 10, i.e., claim 21.

4. If species II is elected, the applicants are further required to select the following patentably distinct species:

Sub-species IIA: an oscillator with a programmable memory having a structure shown in figure 23.

Sub-species IIB: an oscillator with a programmable memory is a programmable gate writer having a structure shown in figure 25.

5. If either sub-species IIA or IIB is elected, the applicants are further required to select the following patentably distinct species:

Sub-species IIAA or IIBA: an oscillator with a delay circuit having a structure shown in figure 34.

Sub-species IIBA or IIBB: an oscillator with a differential delay circuit having a structure shown in figure 38B.

6. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 14 is generic to a group of claims and claim 27 is generic to another group of claims.

7. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable

Art Unit: 2816

thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

8. Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

9. Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

10. A telephone call was made to an attorney of record on 4/21/05 to request an oral election to the above restriction requirement, but did not result in an election being made.

11. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 2816

12. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

13. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Minh Nguyen whose telephone number is 571-272-1748. The examiner can normally be reached on Monday, Tuesday, Thursday, Friday 7:00-5:30.
